

Creative tip FIMO soft „egg cups“

Step 1

Material:

To make 6 egg cups in 3 different colours you will need:

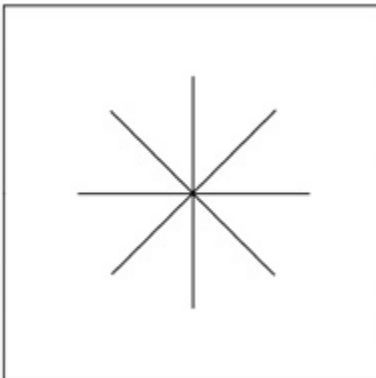

3 x FIMO SOFT in white (0), 1 block each of the colours apple green (50), mint (39) and transparent green (504). In addition, you will need 1 sheet of glass to serve as a work surface, 1 craft knife, 1 rubber roller and several small wooden sticks.

## Step 2

Mix 1 entire block of white with 1/3 of a block of coloured FIMO SOFT. Repeat for all three colours. This will leave you with 3 different pastel colours in varying shades of greeny blue. In order to achieve a uniform colouring, roll the FIMO out again and again. (This is easier to do using a pasta machine!). Roll out the finished mixture to an approx. 5 mm thick sheet. Use the pattern to cut out the square shape. Then, using the craft knife, make star-shaped cuts (see pattern) in the middle of the FIMO square. Turn the corners up using the wooden sticks. Push the corners far enough apart for an egg to fit in the gap. In order to ensure that the square does not get misshapen, leave the egg cup as it is on the sheet of glass and place in a pre-heated oven to harden for 30 minutes at 130°C.

After cooling, carefully remove the egg cup from the sheet of glass.

### Tip

Cut along the star-shaped lines on the pattern in advance, place the pattern on the square of FIMO and then go over the pre-cut star-shaped lines again with the knife.
